

KETRON MIDJAY PLUS

Midjay Plus is the new expanded version of Midjay with a 64 MB Wavetable (twice the size of the standard version) this offers a new and remarkable variety of sounds (among them a stereo grand piano), drum sets and grooves.

Thanks to this new sound generation, **Midjay Plus** is able to faithfully reproduce both MIDI files and styles in a far more balanced and authentic manner. Increased Wavetable capacity has also given our technicians an opportunity to still further improve the voice section - the pre-selected sounds of the instrument - raising our trademark "Best Natural Sound" to an even higher standard.

The automatic style arrangement section has been considerably revised to include 140 new internal styles derived from the highly acclaimed Ketron SD5/SD3 series. **Midjay Plus** makes available the best unplugged, pop, swing, folk, Latin and ballroom accompaniments, not forgetting all the very best and latest dance styles which are currently exclusive to Ketron professional arrangers.

The DJ Loop has now been enriched with new "chill out", "lounge" and "dance" ambience sounds. **Midjay Plus** is also provided with a standard 80 GB hard disk where enormous quantities of music in WAV, MP3 and MIDI format can be saved and more importantly - played almost immediately.

The new display with a resolution of 320x240 pixel offers vastly improved browsing through the directories while a new contrast controller arranged on the front panel of the instrument enables you to adjust the display when working in less favourable conditions.

To get an even wider display, perhaps when using the Midjay for Karaoke events, **Midjay Plus** can be connected to a standard external VGA monitor. The new operating system has an optimised version of the standard 4.0 which considerably reduces start-up times and is ideally configured for use with Windows Vista and Mac OS X.

live audio & midi player

SPECIFICATIONS

PANEL	Alpha Dial, 8 Volume slider controls, 40 direct easy access tabs, display contrast control.
DISPLAY	LCD 320x240 backlit.
WAVETABLE	Over 380 Voices, 32 Drum Sets, 66 Live Drums. GM standard.
